The transactions relating to the investments will be carried out by separate Debt and Equity Dealers. The processes and risks in the Investment activities will be monitored through a senior functionary reporting to the CIO. Investment committee is playing the role of governance and supervisory body for all investment related activities. The committee will hold a meeting on a periodic basis for a detailed review of portfolio holdings, scheme performance and investment strategy and also to ensure adherence to all internal processes. The Investment Committee monitors and supervises the investment decisions made by the Investment team and also monitors the risk parameters in each scheme to ensure that the investment limits are properly observed. The risk origination for the investments is done based on the guidelines issued by SEBI and Board of Trustees. #### Dividend Option

Under this Option, it is proposed to declare dividends subject to availability of distributable profits, as computed in accordance with SEBI (MF) Regulations. On reinvestment of dividends, the number of Units to the credit of Unit holder will increase to the extent of the dividend reinvested divided by the Applicable NAV as explained above. There shall, however, be no Entry Load and Exit Load on the dividend so reinvested. The AMC reserves the right to introduce a new option / investment Plan at a later date, subject to the SEBI (MF) Regulations.

##### 1. Valuation of Equity and Equity related Instrument :-

Equity and Equity related instruments include the following:

- Equity Stock

- Warrants
- Preference Shares
- Rights issue
- ADR/GDR
- IDR

## 1.1 Valuation of Equity Shares

### 1.1.1 Traded Securities:-

- a) On a valuation day, traded securities are to be valued at the last quoted closing price on the principal Stock Exchange.
- b) When on a particular valuation day, a security has not been traded on the principal stock exchange; the value at which it is traded on secondary stock exchange may be used.
- c) When a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the Principal stock exchange or any other stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than 30 days prior to valuation date.
- d) BSE is considered as the principal stock exchange for equity valuation except for SBI Nifty Index fund where NSE is considered as the principal stock exchange as per the Trustee Approval.

### 1.1.2 Thinly Traded / Non- traded Securities

- a) A list of thinly trade securities is taken from stock exchanges (i.e. NSE and BSE) and also from Bloomberg on a monthly basis at every month end.
- b) When a security is not traded in any of the stock exchange for the period of thirty days prior to the valuation date, it should be treated as Non-Traded Securities.
- c) Thinly Traded/Non Traded securities are valued in “good faith” on the basis of the valuation principles laid down below:
  - i) Based on the latest available Balance Sheet, net worth shall be calculated as follows:
  - ii) Net worth per share would be calculated as follows: Net Worth per share = [share capital + reserves (excluding revaluation reserves) - Miscellaneous expenditure and Debit Balance in P&L A/c] Divided by No. of Paid up Shares.
  - iii) Average capitalisation rate (P/E ratio) for the industry based on either BSE or NSE data shall be taken and discounted by 75% for calculating the P/E ratio. Earnings per share of the latest audited annual accounts will be consistently considered for this purpose.
  - iv) The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for ill-liquidity so as to arrive at the fair value per share
  - v) In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
  - vi) In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
  - vii) In case an individual security accounts for more than 5% of the total assets of the scheme an independent valuer shall be appointed for the valuation of the said security

### 1.1.3 Valuation of Suspended Security

1. If the equity is suspended upto 30 days, then the last traded price would be for valuation of that security.

2. If the equity security is suspended for more than 30 days, then the fair valuation of Non-Traded/Thinly traded security would be applied on the basis of valuation principles laid down by SEBI.

#### 1.1.4 Valuation of Unlisted Securities:-

Unlisted equity shares of a company shall be valued "in good faith" on the basis of the valuation principles laid down below:

- a. Based on the latest available audited balance sheet available within 9 months of the close of the year, net worth shall be calculated as lower of (i) and (ii) below:
  - i. Net Worth per share = [share capital plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid up Shares.
  - ii. After taking into account the outstanding warrants and option, Net Worth per share shall again be calculated and shall be = [share capital plus consideration on exercise of Option/Warrants received/receivable by the Company plus free reserves(excluding Revaluation Reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid up Shares plus Number of Shares that would be obtained on conversion/exercise of Outstanding Warrants and Options.

The lower of (i) and (ii) above shall be used for calculation of Net Worth per share and for further calculation in (c) below.

- b. Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.
- c. The value as per the Net Worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 15% for illiquidity so as to arrive at the fair value per share.
  - All calculation shall be based on audited accounts.
  - In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
  - In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
  - If Net worth of company is negative, the shares of such companies shall be valued at zero.
  - In case an individual security accounts for more than 5% of the total assets of the scheme an independent valuer shall be appointed for the valuation of the said security.
  - At the discretion of the AMC and with the approval of the Trustees, an unlisted equity share may be valued at a price lower than the value derived using the aforesaid methodology.
  - In addition to the above, in respect of valuation of equity security of companies created out of demerger where in the absence of availability of Balance Sheets of the restructured entities in the public domain, such guidelines are difficult to adopt, the following guidelines shall be adopted. In such cases the securities come up for listing after a few days while the valuation is required to be carried out effective on the date of demerger itself. Besides, in such cases there are generally no comparative parameters readily available for carrying out the valuation exercise
  - Following approaches /methods are being used to value equity securities in unlisted space

1. Price/Book Multiple approach
2. Price /Earnings Multiple Approach
3. Discounted Cash Flow Approach

Following methods are derivation of three methods outlined above. From the following any one method may be used for valuation of unlisted equity securities wherever considered appropriate.

1. Price to Sales Approach
2. Price to Cash Flow Approach
3. Economic Value added Approach
4. EV/EBITDA Approach.
5. EV/per operating metrics

- d. In addition to the above ,in case an entity is demerged into 2 or more entities, and one of those entitles continues to be listed, the value of the unlisted security/securities can be calculated as the difference between the closing price of the security that continues to be listed on the ex-date and the previous trading date.
- e. Securities awaiting listing on account of IPO is to be valued at allotment price.

#### 1.1.5 Valuation of Illiquid Securities:-

Illiquid securities shall be valued in good faith. Aggregate value of "illiquid securities" of scheme, which are defined as non-traded, thinly traded and unlisted equity shares, shall not exceed 15% of the total assets of the scheme and any illiquid securities held above 15% of the total assets shall be assigned zero value.

#### 1.1.6 QIP (Qualified Institutional Placement-Equity Shares)

The equity shares allotted through QIP process should be considered on the same lines as the existing listed equity shares and hence should be valued at the market/traded price of the existing listed equity shares.

#### 1.2 Warrants:-

- a) In respect of warrants to subscribe for shares attached to instruments, the warrants would be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. A discount similar to the discount to be determined in respect of convertible debentures shall be deducted to account for the period which must elapse before the warrant can be exercised.
- b) In case the warrants are traded separately they would be valued as per the valuation guidelines applicable to Equity Shares.

#### 1.3 Rights Issue:-

- a) Where it is decided not to subscribe to the Rights but to renounce them and renunciations are being traded, the Rights can be valued at the renunciation value.
- b) If the Rights are not traded then the rights entitlement will be valued as per the following methodology:

$$V_r = n/m * (P_{ex} - P_{of})$$

Where  
 $V_r$  = Value of rights

n = No. of rights offered  
 m = No. of original shares held  
 Pex = Ex-rights price  
 Pof = Rights Offer Price

- c) The valuation of the Rights shares as per the above methodology will be continued till the date of demat credit. From the date of credit in demat account, the valuation will be done as per the normal valuation applicable as in case of Equity Shares.

#### 1.4 Futures:

- a) On the valuation day, settlement price will be considered for valuation.
- b) If the settlement price is not available, then closing price for the security will be considered for the valuation.
- c) In case of Futures MTM is computed on daily basis.
- d)  $MTM\ Gain/Loss = Current\ day\ settlement/Closing\ price - Previous\ day\ settlement/Closing\ price$  (If scrip is purchased first time then it is a  $Current\ day\ settlement / Closing\ price - Weighted\ Average\ Price\ (WAP)$ ).
- e) MTM is computed on scrip wise and series wise.
- f) Day end closing prices or settlement prices are available on NSE website which will be uploaded in the system. System computes MTM by comparing prices from such file.

#### 1.5 Options:

- On the valuation day settlement price will be considered for valuation.
- If the settlement price is not available, then closing price for the option will be considered for the valuation.

#### 1.6 Preference Shares:

On a valuation day, traded securities are to be valued at the last quoted closing price. BSE will be the principal stock exchange and NSE will be the secondary stock exchange for all schemes except SBI Nifty Index Fund where NSE would be the primary stock exchange. Non-traded non convertible preference shares will be valued on the basis of norms governing the valuation of Non Convertible Debentures and Bonds under valuation of Debt Security category. Non traded convertible Preference shares will be valued on the basis of norms governing Equity Valuation.

#### 1.7 Indian Depository Receipt:

Valuation of IDRs listed in the India Stock Exchange would follow the valuation norms adopted for the listed equity shares. IDR is valued at last quoted closing price at which they are traded on BSE/NSE exchange. In case the IDRs are classified as thinly traded, the criteria, as laid above for listed Indian Equity shares shall be applied taking into consideration the relevant company's balance sheet.

#### 1.8 American Depository Receipt / Global Depository Receipt and all overseas securities:

If the security is listed in time zone ahead of ours then the same day's closing price would be used for valuation. The price in local currency would be obtained and closing RBI reference rate on valuation date would be used to calculate the closing price. If the security is listed in the time zone behind ours then the previous day's price would be used for valuation. The price in the local currency would be obtained and the closing RBI reference rate on valuation date would be used to calculate the closing price. If the stock is listed in the currency for which the RBI reference rate is not available, the exchange rates available from Reuters will be used. In case direct exchange rate is not available in Reuters, cross currency rates with USD will be used and converted into INR.

## 2. Valuation of Debt Securities:-

### 2.1 Valuation of Debt Securities which includes NCD, Bonds, ZCBs and Money Market securities which includes CPs, CDs:-

#### A) Instruments having maturity greater than 60 days

The valuation will be on the basis of average of prices (Scrip level prices) released by CRISIL and ICRA.

In case of new security purchased, CRISIL and ICRA are providing scrip level prices from T+1 date. Such securities are valued on the basis of weighted average yield at which the securities are purchased. The principle of T+1 valuation is followed to value such securities

In line with SEBI Regulations, Fund Managers are permitted to mark up/mark down the security yields to reflect the fair valuation on the basis of the following criteria. Justification shall be provided by the Fund Manager whenever mark up/mark down is done.

	Maximum Mark Up Bps	Maximum Mark Down Bps
Securities <= 365 days	150	-50
Securities > 365 days	75	-25

Whenever there is change in credit profile of the issuer a re-evaluation will be done for the appropriateness of the spread.

#### B) Instruments maturing upto 60 days

Instruments may be valued by amortization on a straight-line basis to maturity from cost or last valuation price whichever is more recent as long as it is within  $\pm 0.10\%$  of the reference price. The reference price is the price derived from benchmark yield  $\pm$  spreads on account of trade. Bench mark yield will be provided by CRISIL or any other independent agencies as may be appointed by AMFI from time to time.

In case such variance exceeds  $\pm 0.10\%$ , the valuation shall then be adjusted to bring it within  $\pm 0.10\%$  such that:

- If the amortized price is greater than the reference price  $+0.10\%$ , the valuation shall be done at reference price  $+0.10\%$ , or within the band of reference price  $+0.10\%$  with proper justification for the same.
- If the amortized price is less than the reference price  $- 0.10\%$ , the valuation shall be done at reference price  $- 0.10\%$ , or within the band of reference price  $-0.10\%$  with proper justification for the same.

Traded prices are to be used for construction of the benchmark yield curve. The yield curve will be provided by CRISIL or any other independent agency/ies as may be appointed by AMFI.

At the time of first purchase the spread between the purchase yield and the benchmark yield should be fixed. This spread should remain fixed through the life of the instrument & should be changed only if there is a justification for the change and the justification for the same should be recorded.

Wherever security has moved off from 61 days residual maturity category to 60 days residual maturity category then the 'valuation yield' of the 61st day shall be compared with the 'reference yield' and thereafter the spread will be fixed.

In case of subsequent trades in the same security / fresh purchase (i.e. security purchased first time) from secondary market by the fund (i.e. AMC's own trades), the valuation must reflect price considering weighted average yield as long as the trade is of market lot and also spread to be fixed. Market lot is defined as a single deal of face value of Rs.25 crores or more. The principal of T+1 valuation is followed to value such securities.

In case of purchases with T+n settlement but not meeting own trades criteria, weighted average yield is considered to value such securities. The principle of T+1 valuation is followed to value such securities. T+1 price so calculated will be used as valuation in case there is no existing position in the said security at the fund level and if there is existing position in the said security at the fund level, then T+1 price so calculated will be used to arrive at weighted average amortized price.

For the purposes of such regulations, we may also be required to provide information to any institutions such as withholding agents for the purpose of ensuring appropriate withholding from the

account or any proceeds in relation thereto. As may be required by domestic or overseas regulators/ tax authorities, we may also be constrained to withhold and pay out any sums from your account or close or suspend your account(s).

Please note that we will be unable to provide advice to you about any tax status or FATCA classification relevant to your account. It is your responsibility to ensure that you record your correct tax status / FATCA classification. You may seek advice from your tax advisor in this regard.
