I. INTRODUCTION

A. RISK FACTORS

1. Standard Risk Factors

- a. Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the Fund's objective will be achieved.
- b. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down
- c. Past performance of the Sponsor / AMC / Mutual Fund or its affiliates does not guarantee the future performance of the scheme(s) of the Mutual Fund.
- d. State Bank of India, the sponsor, is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution made by it of an amount of Rs. 5 lakhs towards setting up of the mutual fund.
- e. SBI Blue Chip Fund is only the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- f. The NAV of the Schemes' Units may be affected by change in the general market conditions, factors and forces affecting capital markets in particular, level of interest rates, various market related factors and trading volumes.
- g. The present scheme is not a guaranteed or assured return scheme.
- h. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.

2. Scheme-specific Risk Factors

- a. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
- b. Redemption by the Magnum/Unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
- c. The tax benefits described in the SID are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.
- d. SBI Blue Chip Fund would be investing in equity & equity related instruments, debt and money market instruments (such call money market, term/notice money market, repos, reverse repos and any alternative to the call money market as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.
- e. Subject to necessary approvals, the Scheme may invest in securities in overseas markets, which could be exposed to currency risk, sovereign risk, economic and political risks. Prices of ADR/GDR may not move in consonance with the domestic underlying stock due to currency movements and the prices could also be trading at a discount/premium to the underlying stocks
- f. Stock Lending: There are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement. Such failure can result in the possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing thereon.
- g. Investments under the scheme may also be subject to the following risks:
 - i. Equity and equity related risk: Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.
 - ii. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

- iii. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
- iv. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- v. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- h. The Mutual Fund is not assuring any dividend nor is it assuring that it will make any dividend distributions. All dividend distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.
- i. The initial issue expenses incurred for the launch of the scheme is being amortized over a period not exceeding five years. Amortization of initial issue expenses would be over and above the annual recurring expenses and to that extent would have an impact the NAV of the scheme on an ongoing basis over a period not exceeding five years.
- j. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels of risk. Accordingly the scheme's risk may increase or decrease depending upon the investment pattern. For e.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risk than bonds, which are AA rated

k. **The risks involved in derivatives are:**

- The cost of hedge can be higher than adverse impact of market movements
- The derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
- An exposure to derivatives in excess of the hedging requirements can lead to losses.
- An exposure to derivatives can also limit the profits from a genuine investment transaction.
- Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

i. Risk factors associated with repo transactions in corporate debt securities:

Corporate Bond Repo transactions are currently done on OTC basis and settled on non guaranteed basis. Credit risks could arise if the counterparty does not return the security as contracted on due date. The liquidation of underlying bonds in case of counterparty default would depend on the liquidity of the bond and market conditions at that time. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also operational risks are lower as such trades are settled on a DVP basis.

In the event of the scheme being unable to pay back the money to the counterparty as contracted in case of transactions as a borrower, the counter party may dispose of the assets (as they have sufficient margin) and the net proceeds may be refunded to the Mutual Fund. Thus, the scheme may in remote cases suffer losses. This risk is normally mitigated by better cash flow planning to take care of such repayments.

3. RISK CONTROL STRATEGIES:

Investments in Equity and equity related instruments including derivatives, debt and money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigates.

For risk control, the following may be noted:

Liquidity risks:

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk. Additionally, the fund will invest in securities maturing on or before the maturity of the fund. Hence, while the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.

Credit Risks

Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification. Further, the fund will invest in a basket of debt and money market securities maturing on or before maturity of the fund with a view to hold them till the maturity of the fund. To that extent the Volatility risk will be mitigated in the scheme.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme.. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS, IF ANY:

(i) Right to Limit Redemptions

The approval from the Board of Directors and the Trustees giving details of circumstances and justification for the proposed action shall also be informed to SEBI in advance.

(ii) Termination of the scheme

The Trustees reserve the right to terminate the scheme at any time. Regulation 39(2) of the SEBI Regulations provides that any scheme of a mutual fund may be wound up after repaying the amount due to the Unit holders:

Blue chip companies normally have a history of successful growth, high visibility and reach, good credit ratings and excellent brand equity amongst the general public and widespread interest amongst investing public.

Apart from the investment restrictions prescribed under SEBI (MF) Regulations, the fund follows internal norms vis-à-vis exposure to a particular scrip or sector. These norms are reviewed on a periodic basis and monitored regularly.

~Investments in foreign securities/ADR/GDR would comply with the Guidelines and overall limits laid down for Mutual Funds by SEBI for investments in foreign securities. Investments in foreign securities/ADR/GDR would also be in companies regarded as blue chip companies.

The scheme may also enter into repurchase and reverse repurchase obligation in all securities held by it as per the guidelines and regulations applicable for such transactions. Any investment in Government securities may be in securities supported by ability to borrow from the Treasury, or sovereign or state government guarantee, or supported by the Government of India / a State Government in any other manner. Further, the scheme may participate in securities lending, invest in foreign securities and trade in derivatives as permitted under SEBI (MF) Regulations, 1996. The scheme would not invest in Securitized Debt.

The above investment pattern is indicative and may be changed by the Fund Manager from time to time, keeping in view market conditions, market opportunities, applicable regulations, legislative amendments and other political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Magnum/Unit Holders. The funds raised under the scheme shall be invested only in transferable securities as per Regulation 44(1), Schedule 7 of the SEBI (Mutual Funds) Regulations, 1996 as amended from time to time.

Illustrations

i. Arbitrage:

Buy 1000 stocks of Company A at Rs 100 and sell the equivalent of stocks future of the Company A at Rs 101.

1. Market goes up and the stock end at Rs 150.

At the end of the month the future expires automatically:

At the settlement date we assume that future price = closing spot price = Rs 150

a. Gain on stock is $1000 \times (150 - 100) = \text{Rs } 50000$

b. Loss on future is $1000 \times (101 - 150) = \text{Rs } -49000$

c. Then gain realized is $50000 - 49000 = \text{Rs } 1000$

2. Market goes down and the stock end at Rs 50.

At the end of the month the future expires automatically:

At the settlement date we assume that future price = closing spot price = Rs 50

a. Loss on stock is $1000 \times (50 - 100) = \text{Rs } -50000$

b. Gain on future is $1000 \times (101 - 50) = \text{Rs } 51000$

Then gain realized is $51000 - 50000 = \text{Rs } 1000$

ii. Unwinding an arbitrage position:

Buy 1000 stocks of Company A at Rs 100 and sell the equivalent of stocks future of the Company A at Rs 101.

The market goes up and at some point of time during the month the stock trades at Rs 150 and the future trades at Rs 149 then we unwind the position:

1. Buy back the future at Rs 149 : loss incurred is $(101 - 149) \times 1000 = \text{Rs } -48000$

2. Sell the stock at Rs 150 : gain realized : $(150 - 100) \times 1000 = \text{Rs } 50000$

3. Net gain is $50000 - 48000 = \text{Rs } 2000$

iii. Roll over the futures:

In this case we keep the underlying stock position intact and roll over the futures position into next month. For example, if the underlying stock is trading around Rs 150 on or closer to the expiry date, the stock future is also generally likely to trade closer to similar levels. In such a case, if the next month futures are trading at levels higher than the current month futures, we roll over the future position to the next month (i.e. instead of letting the current month future expire (on expiry day), we buyback the current month future and sell the next month future in its place, keeping the underlying stock position unchanged):

a. Stock future next month is at Rs 151

b. Stock future actual month is at Rs 150

c. Then sell future next month at Rs 151 and buy back actual future at Rs 150 => gain of $1000 \times (151 - 150) = \text{Rs } 1000$ and the arbitrage is continuing.

In case, the future price trades at discount to spot price (any time during the period till the expiry date) then the original position will be squared by buying the future and selling the spot market position.

Further the exposure limits for trading in derivatives by Mutual Funds specified by SEBI vide its Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010 are as follows:

1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
2. Mutual Funds shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 3.
 - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 3.
8. Definition of Exposure in case of Derivative Positions
9. Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts

II. The risks involved in derivatives are:

1. The cost of hedge can be higher than adverse impact of market movements
2. The derivatives will entail a counter-party risk to the extent of amount that can become due from the party.
3. An exposure to derivatives in excess of the hedging requirements can lead to losses.
4. An exposure to derivatives can also limit the profits from a genuine investment transaction.
5. Efficiency of a derivatives market depends on the development of a liquid and efficient market for underlying securities and also on the suitable and acceptable benchmarks.
6. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

III. Methods to tackle these risks:

1. Hedging will not be done on a carpet basis but based on a view about interest rates, economy and expected adverse impact.
2. Limits of appropriate nature will be developed for counter parties
3. Such an exposure will be backed by assets in the form of cash or securities adequate to meet cost of derivative trading and loss, if any, due to unfavorable movements in the market.

IV. The losses that may be suffered by the investors as a consequence of such investments:

1. As the use of derivatives is based on the judgment of the Fund Manger, the view on market taken may prove wrong resulting in losses.
2. The upside potential of investments may be limited on account of hedging which may cause opportunity losses.

V. The use of derivatives for hedging will give benefit of:

1. Curtailing the losses due to adverse movement in interest rates
2. Securing upside gains at cost

VI. VALUATION OF DERIVATIVES

- i. The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the SEBI Regulations.
- ii. The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the SEBI Regulations.

VII. REPORTING OF DERIVATIVES

The AMC shall cover the following aspects in their reports to trustees periodically, as provided for in the Regulations:

- i. Transactions in derivatives, both in volume and value terms.
- ii. Market value of cash or cash equivalents / securities held to cover the exposure.
- iii. Any breach of the exposure limit laid down in the scheme Information document.
- iv. Shortfall, if any, in the assets covering investment in derivative products and the manner of bridging it.

The Trustees shall offer their comments on the above aspects in the report filed with SEBI under sub regulation (23) (a) of regulation 18 of SEBI Regulations.

F. Portfolio turnover

The Portfolio Turnover is defined as the lower of the value of purchases or sales as a percentage of the average corpus of the Scheme during a specified period of time. The Asset Management Company does not have a policy statement on portfolio turnover. Generally, the Asset Management Company's portfolio management style is conducive to a low portfolio turnover rate. However, given the nature of the Scheme which follows a monthly cycle or rollover / positions the portfolio turnover is expected to be high. Further, there are trading opportunities that present themselves from time to time. These trading opportunities may be due to trading opportunities in equities, changes in interest rate policy by the Reserve Bank of India, shifts in the yield curve, credit rating changes or any other factors where in the opinion of the fund manager there is an opportunity to enhance the total return of the portfolio. It will be the endeavour of the fund manager to keep portfolio turnover rates as low as possible.

L. DEBT MARKET IN INDIA

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Institutional Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the CBLO (collateralized lending and borrowing facility).

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and CBLO are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments as on May 11, 2015:

Instruments	Indicative yield range
Overnight ratesx	7.25%-7.50%
90 day Commercial Paper	8.60%-8.85%
91-day T-bill	7.94%-7.97%
1 year G-Sec.	7.88%-7.90%
5 year G – Sec	7.93%-7.97%
10 year G-Sec.	7.90%-7.95%
1 year AAA Bond	8.55%-8.65%
5 year AAA Bond	8.53%-8.57%

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

M. INVESTMENTS OF AMC IN THE SCHEME

The AMC may invest in the scheme, such amount, as they deem appropriate. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 24(3) of the SEBI (MF) Regulations, 1996 which states that:

"The asset management company shall not invest in any of its schemes unless full disclosure of its intention to invest has been made in the **Scheme Information Document (SID)**, provided that the asset management company shall not be entitled to charge any fees on its investment in the scheme."

N. INVESTMENTS IN OTHER SCHEMES

According to the Clause 4 of Schedule 7 read with Regulation 44(1), of the SEBI (MF) Regulations, 1996:

"A scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investments made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund."

O. STOCK LENDING

If permitted by SEBI under extant regulations/guidelines, the scheme may also engage in stock lending. Stock lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period. The Fund may in future carry out stock-lending activity under the scheme, in order to augment its income. Stocklending may involve risk of default on part of the borrower. However, this risk will be substantially reduced as the Fund has opted for the "Principal Lender Scheme of Stock Lending", where entire risk of borrower's default rests with approved intermediary and not with the Fund. There may also be risks associated with Stock Lending such as liquidity and other market risks. Any stock lending done by the scheme shall be in accordance with any Regulations or guidelines regarding the same. The AMC will apply the following limits, should it desire to engage in Stock Lending:

- (a) Not more than 20% of the net assets can generally be deployed in Stock Lending
- (b) Not more than 5% of the net assets can generally be deployed in Stock Lending to any single counter party.

P. PROCEDURES FOLLOWED FOR INVESTMENT DECISIONS

The process of approval of transactions is done by the investment team comprising of Chief Investment Officer (CIO), Vice President (Investment Risk & Process Control) and all Fund Managers. The committee also invites the Compliance Officer and Head of Research in its meetings. The investment committee holds periodic meetings for a detailed review of investment strategy, portfolio holdings, review of research and dealing activities, analysis of scheme performances and also to ensure adherence to all internal guidelines and processes. The Investment Committee monitors and supervises the investment decisions made by the Investment team and also monitors the risk parameters in each scheme to ensure that the investment limits are properly observed. The risk origination for the investments is done based on the guidelines issued by SEBI and Board of Trustees. Concurrent auditors periodically check the limits and their reports are placed before the Audit Committee, which is comprised of the independent Directors and Trustees. The monitoring of decisions is taken through quarterly secondary and primary market report to the

Directors. All the deals, both primary and secondary market are reported periodically to the investment committee and the Board of Trustees.

15. Investment in repo in Corporate Bonds

In accordance with the applicable regulatory guidelines on repo transactions, the following broad guidelines shall be followed by the Fund for participating in repo in corporate debt securities:

1. The gross exposure of the scheme to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the concerned scheme.
2. The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt and derivatives shall not exceed 100% of the net assets of the concerned scheme.
3. The Scheme shall participate in repo transactions only in AA and above rated corporate debt securities.
4. The Scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of 6 months in terms of Regulation 44 (2) of SEBI (Mutual Funds) Regulations, 1996.

Further, the following conditions and norms shall apply to repo in corporate debt securities as approved by the Board of AMC & Trustee Company:

1. **Category of counterparty** - The schemes of SBI Mutual Fund would transact in corporate bond repo only with counterparties in the approved list applicable for secondary market transactions in Corporate and Money market securities.
