Companies would be identified through a systematic process of forecasting earnings based on a deep understanding of the industry growth potential and interaction with company management to access the company's core competencies to achieve long-term sustainable profit growth. The Scheme is expected to</p>		

deliver superior relative returns for investors looking for a focused aggressive portfolio of fundamentally good businesses. The guiding principles while managing the portfolio are summarized below :

- 1) **Sustainable company profits drives long term share value** : Fund management would focus primarily on business fundamentals of the underlying company. The Equity Research process will endeavour to acquire a robust understanding of the dynamics of the underlying business. This would form the basis for forecasts on future profitability and sustainability of cash profit growth. Stock prices of companies that can sustain periods of high cash profit growth will outperform the markets over the long term. Investors entering this scheme are therefore expected to have at least a one year time horizon.
- 2) **Acquire stocks at reasonable value**: Once good businesses are identified, stocks would be acquired when they are available at a reasonable value. Overall market corrections and stock price falls due to temporary factors that don't affect long-term profitability are an excellent opportunity to buy stocks cheap.
- 3) **Monitor market interest to ensure consistent performance**: Systematically tracking over stock ownership and over researched sectors would help to reduce the risk of a sudden sell off. Stock prices react to event triggers that are constantly monitored to ensure that portfolio performance is more consistent.

Debt: The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio limits.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.

The scheme(s) proposes to invest in equity and equity related instruments. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities' purchases due to settlement problems could cause the Scheme to miss certain investment opportunities.

Risk Mitigation Factors

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in thematic equity funds. The risk control process involves identifying & measuring the risk through various risk measurement tools. The Fund has identified following risks and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk	Risk mitigants / management strategy
Quality risk : Risk of investing in stocks with poor performance	Portfolio carefully selected to only include high quality stocks
Market risk : Risk of adverse price movement in portfolio	Equity as an asset class tends to be volatile in the short term. A Thematic fund is likely to have a higher volatility as compared to a diversified fund.
Concentration risk : Risk of undue concentration in a single stock	The fund manager will have appropriate risk management policies to ensure that the portfolio is not unduly concentrated
Liquidity risk : Risk of liquidity impact of entering/ exiting the underlying stocks in the portfolio	The fund manager will give due care to the liquidity of the stocks while deciding its allocation to the portfolio.
