- A) **‘CanServe’ facility under Dividend Payout Option** to facilitate Investors who are desirous to contribute dividend payouts towards a medical cause. Under the Dividend option, Investors by opting for ‘CanServe’ Option can donate the dividend payout to be declared on a prospective basis. The investors will have a choice to donate either i) 50% of the dividend declared or ii) 100% of the dividend declared in future, subject to a minimum amount of donation of Rs.1000/-. - B) **‘CanServe’ facility under Growth option** to facilitate Investors who are desirous to contribute a specified sum periodically towards a medical cause. Under the Growth option, Investors by opting for ‘CanServe’ facility can contribute by indicating a specified amount (Minimum Rs. 1000/- at each half-yearly payout) to be paid out under this facility by redeeming corresponding units on semi - annual basis. If no amount is mentioned by the Investor, the default ‘specified amount’ will be Rs.1,000/- per payout period. Such redemption will be done on the 1st business day of April and October at the NAV applicable on that day. In case the value of units held by the Investor on the specified date is less than the ‘specified amount’, no units would be redeemed on that date.

The contributions mentioned above under A) and B) will go to St. Jude India Child Care Centres as donation towards medical / social cause. St. Jude India ChildCare Centres provides cost-free housing, nutritional support, counseling, educational and recreational activities, therapy and yoga to the needy and under-privileged children who are being treated for cancer and their families, during the period of the child's treatment. IV. PROCEDURE FOLLOWED AT UTI AMC FOR TAKING INVESTMENT DECISIONS, INVESTMENT VALUATION NORMS FOR SECURITIES AND OTHER ASSETS

1. The investment set-up

The broad procedure followed at UTI AMC for taking investment decisions is summarised as follows:

- (i) The investments of the scheme are managed by a Fund Manager on a regular basis. The Fund Manager constructs the appropriate portfolio in the light of the scheme objectives, prudential exposure norms, fund size, tenure of the scheme and the liquidity required for income distribution considering the normal redemption etc. All the investment decisions are based on scheme's investment objectives, internal guidelines, regulatory restrictions etc. The portfolio is monitored based on the research inputs, present & expected market conditions, future outlook on the economy/sectors/individual scrip and fresh inflows/outflows in the scheme with a view to optimise the returns under the scheme. The Fund Manager's operational strategy and its implementation are reviewed by the Head of Equity on an ongoing basis.

- (ii) Department of Securities Research is an internal set-up with analysts tracking specific sectors, which provides regular inputs to the Fund Managers on stocks/industries/sectors, implication of Govt./RBI policies and trends in international markets. The Fund Managers and Research Analysts interact regularly through meetings and presentations. These inputs are discussed thoroughly in these meetings. The Fund Managers and Analysts visit companies to obtain all publicly available information on company performance/ management perspectives. The Fund Managers also attend company presentations as well as presentations by external research outfits/broking firms on company/ industry performance.
- (iii) **Primary market investments:** The investments in Initial Public Offerings and Private Placements in primary markets are screened and scrutinized by research team/FMs. On the basis of the information and/or research reports, the Fund Managers give their recommendation on the proposals keeping in mind the scheme's investment objectives, internal guidelines and SEBI guidelines. Such proposals are approved by Head of Fixed Income/Head of Equity/Executive Investment committee (EIC) as per delegation of power.
- (iv) **Secondary market investments:** Fund Managers also interact with Research Analysts and Dealers on regular basis. The Fund Managers also have access to external sources of data from analysts, publicly available information about company / sector etc. The Fund Manager prepares a strategy paper for the scheme on periodic basis, which is discussed with senior management of UTI AMC. Finally, these investment decisions made by the Fund Managers are executed by the designated dealer.
- (v) **Inter Scheme Transfers:** The inter-scheme buy and sale transactions are effected as per the SEBI Regulations.
- (vi) **Monitoring:** A memorandum to the Board of Directors of the UTI Asset Management Company & Trustee Company is submitted containing a report on Investment Operations of UTI AMC for UTI MF schemes for each quarter.

2. Computation and disclosure of NAV

- (a) The Net Asset Value (NAV) of the scheme shall be calculated by determining the value of the scheme's assets and subtracting therefrom the liabilities of the scheme taking into considera-

tion the accruals and provisions. NAV shall be declared separately for different options of the scheme.

- (b) The NAV per unit shall be calculated by dividing the NAV of the scheme by the total number of units issued and outstanding on the valuation day. The NAV will be rounded off upto four decimal places.
- (c) When the securities are traded on more than one recognised stock exchange, the securities shall be valued at the last quoted price on the stock exchange, available at the time of valuation of scheme portfolio for the purpose of computing the NAV, where the securities are principally traded. UTI AMC will select the appropriate stock exchange for each such security, but the reasons for the selection would be recorded in writing. All scrips may be valued at the price quoted on the stock exchange where a majority in value of the investments is principally traded. Once a stock exchange has been selected for valuation of a particular security, reasons for change of the exchange shall be recorded in writing by UTI AMC.
- (d) A valuation day is a day other than (i) Saturday and Sunday (ii) a day on which both the stock exchanges (BSE and NSE) and the banks in Mumbai are closed (iii) A day on which the purchase and redemption of units is suspended. If any business day in UTI AMC, Mumbai is not a valuation day as defined above then the NAV will be calculated on the next valuation day and the same will be applicable for the previous business day's transactions including all intervening holidays.
- (e) The NAVs will be calculated and disclosed on every business day. The AMC will prominently disclose the NAVs under a separate head on the website of UTI Mutual Fund (www.utimf.com) and of the Association of Mutual Funds in India (AMFI) (www.amfindia.com) on every Business Day.

Mutual Funds/ AMCs shall extend the facility of sending latest available NAVs to unitholders through SMS, upon receiving a specific request in this regard.

3. Valuation of investments:

Valuation Policy and Procedures

I. Equity and Equity related Securities:

- (a) **Traded Securities (Equity shares and equity related securities like rights, warrants, preference shares etc.)**

A security is treated as 'traded' in the following circumstances:

- The security is traded on any stock exchange within a period of 30 days (including the date of valuation) and if:
 - the aggregate volume of trade during such period is more than 50,000; or
 - the trade value is greater than Rs.5,00,000
- these are valued at the closing prices on NSE, (and if NSE price is not available BSE price is considered). The principle stock exchange for valuation of equity shares is NSE. The equity shares held in the UTI SENSEX ETF and UTI SENSEX Next 50 ETF will be valued at their closing prices as per the BSE.

(b) Non traded / Thinly traded / Unlisted equity shares:

Investments in securities, which have not been traded on any stock exchange in the aforesaid manner, are stated at fair value as determined by UTI AMC in accordance with the provisions of the SEBI (Mutual Fund) Regulations, 1996 as detailed below.

Based on the latest available Balance Sheet, net worth shall be calculated as follows:

Share Capital
 Plus: Reserves (excluding revaluation Reserve)
 Less: Miscellaneous Expenditure
 Less: Intangible Assets (in case of unlisted securities)
 Less: P & L Accounts (Debit Balance)

The resultant figure is the Net Worth of the Company, which when divided by the numbers of shares outstanding gives the net worth per share.

Capitalized earning price will be arrived at by multiplying the earnings per share with the discounted industry P/E ratio. Average capitalization rate (P/E ratio) for the industry based upon either BSE or NSE data shall be taken and discounted by 75%. Earnings per share of the latest audited annual accounts will be considered for this purpose. The value as per the net worth value per share and capital earning value calculated as above shall be averaged and further discounted by 10% for illiquidity so as to arrive at the fair value. In case of unlisted equity shares the discount factor will be 15% instead of 10%.

In case, the Earning per share (EPS) is -ve, EPS value for that year shall be taken as zero for arriving at capitalized earning. In case latest

balance sheet is not available within 6 months from the close of the year, the shares of such companies shall be valued at zero. If the net worth of the company is -ve the share would be marked down to zero. In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security.

In case the fair value price so arrived is higher than the latest available quote price, then quote price is considered, provided the quote price is not older than 30 days.

(c) Non traded / Thinly traded / Unlisted rights share/Debt in the form of Rights and warrants:

The rights will be valued at the difference between the daily Ex-rights price of underlying equity share and rights offer price for the entire period. In case the exercise price is greater than the ex-rights price, the value of the rights share is to be taken as zero. In case exercise price is payable in more than one installment, then the rights shares are valued at underlying equity share price minus uncalled liability. Where the rights/warrants are not treated pari passu with the existing shares, suitable adjustment should be made to the value of rights/warrants. In case of unlisted company, the rights share value is taken into consideration after their allotment by way of recomputing the fair value of the equity shares, after considering the allotment of rights. If Debt securities in the form of rights are issued, the same is valued as per the debt valuation norms, from the date of allotment of the securities. Till such time they are valued at face value - exercise price or as suggested by the valuation committee. Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

(d) Non traded / Thinly traded / Unlisted Preference shares:

Non-convertible preference shares are valued at the present value of future expected dividend payments and maturity value, discounted at the expected rate of return on preference shares. The valuation committee will decide upon variables like expected future dividend, expected rate of return etc. on a case to case basis depending on the terms of issue of the preference shares.

Convertible preference shares will be valued based on the underlying equity, further

discounted for illiquidity at an appropriate percentage. The illiquidity percentage will be decided by the Valuation Committee on a case to case basis.

The valuation committee may in specific cases decide to use a different method for valuation of preference shares by assigning reasons therefor.

(e) Corporate Action:

In case of demerger if Shares of only one company continue to be traded on demerger, the other security is valued at traded value on the day before the demerger less value of the traded security post demerger. The valuation committee may decide to apply appropriate illiquidity discount on a case to case basis. If the post demerger value of the share of the de merged and traded company is equal or in excess of the value of the pre demerger share, then the non-traded share is to be valued at zero.

If both the shares are not traded on demerger: the traded price prior to demerger, will be allocated between the post-demerger companies on an appropriate basis like Price Earnings ratio, net worth or any other measure, as per the decision of the Valuation Committee.

The untraded/unlisted shares resulting from demerger will be valued on fair valuation basis after the audited annual financial results of the demerged company are available.

In case of corporate actions like bonus shares having differential voting rights, bonus debentures (where terms of security like coupon, maturity date etc., are not known) etc., these are referred to the valuation committee to discover the prices of such securities.

In case of merger, if the shares of the merged entity are not listed/traded, then valuation of merged entity shall be arrived at based on the terms of merger and previous day's closing price of the respective companies prior to merger.

The price of the unlisted shares arising out of corporate actions as arrived at above, will be reviewed by the valuation committee at half yearly intervals till such time that the audited

annual financial results of the company are available.

(f) Initial Public Offering ('IPO') application.

IPO application awaiting allotment would be valued at allotment price / bid price

Coupon bearing securities will be valued at weighted average trade price of the deals in that security done by schemes of UTI Mutual Fund for latest trade day.

The valuation committee may, in exceptional circumstances decide to value a security at a price other than the average of CRISIL and ICRA prices by recording justification for the same.

ANNEXURE 1

Waterfall Approach for the Valuation of Money Market and Debt Securities

Part A: Valuation of Money Market and Debt Securities other than G-Secs

1. Waterfall Mechanism for valuation of money market and debt securities:

The following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

1. Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN
2. VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below)
3. VWAY of secondary trades of same issuer, similar maturity
4. VWAY of primary issuances through fixed price auction of same issuer, similar maturity
5. VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below)
6. VWAY of secondary trades of similar issuer, similar maturity.
7. VWAY of primary issuance through fixed price auction of similar issuer, similar maturity
8. Construction of matrix (polling may also be used for matrix construction)

9. In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months.

Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAY of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary/Credit Policy
- ii. Union Budget
- iii. Government Borrowing/ Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events

- vi. which have a material impact on yields
- vii. Central Government Election Days
- Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

2. Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below.

Residual Tenure of Bond to be priced	Criteria for similar maturity
Upto 1month	Calendar Weekly Bucket
Greater than 1month to 3 months	Calendar Fortnightly Bucket
Greater than 3 months to 1year	Calendar Monthly Bucket
Greater than 1year to 3 years	Calendar Quarterly Bucket
Greater than 3 years	Calendar Half Yearly or Greater Bucket

In addition to the above:

- a. In case of market events, or to account for specific market nuances, valuation agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events / nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.

- b. In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.
- c. The changes / deviations mentioned in clauses a and b, above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

3. Process for determination of similar issuer

Valuation agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuer do not always refer to issuers which trade at same yields, but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- i. Issuers within same sector/industry and/or
- ii. Issuers within same rating band and/or
- iii. Issuers with same parent/ within same group and/or
- iv. Issuers with debt securities having same guarantors and/or
- v. Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP)

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the valuation agencies. The criteria used for such determination should be documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/news/action in any security/ies within the similar issuer group.

4. Recognition of trades and outlier criteria

- i. **Volume criteria for recognition of trades (marketable lot)**

Paragraph 1.1.1.1(a) of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, prescribes that the marketable lots shall be defined by AMFI, in consultation with SEBI. In this regard, marketable lot is defined as under.

The following volume criteria shall be used for recognition of trades by valuation agencies:

Parameter	Minimum Volume Criteria for marketable lot
Primary	INR 25 cr for both Bonds/NCD/CP/ CD and other money market instruments
Secondary	INR 25 cr for CP/ CD, T-Bills and other
Secondary	INR 5 Cr for

Trades not meeting the minimum volume criteria i.e. the marketable lot criteria as stated above shall be ignored.

ii. Outlier criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by valuation agencies for determining outlier criteria.

- a. Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semi-liquid, Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.
- b. The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.
- c. Potential outlier trades which are identified through objective criteria defined above will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.

- d. The following criteria shall be used by valuation agencies in determining Outlier Trades
- e. Liquidity Bps Criteria (Yield movement over previous day yield after accounting for yield movement of matrix)

Liquidity Classification	Bps Criteria		
	Upto 15 days	15-30 days	Greater than 30 days
Liquid	30 bps	20 bps	10 bps
Semi-liquid	45 bps	35 bps	20 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by valuation agencies and any change would be carried in consultation with AMFI.

- f. In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below.

Liquidity classification criteria — liquid, semi-liquid and Illiquid definition

Valuation agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria

- a. Trading Volume
- b. Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI.

Trading Volume (Traded days based criteria):

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

- Liquid >=50% of trade days
- Semi Liquid >=10% to 50% trade days
- Illiquid <10 % of trade days

Spread based criteria:

Spread over the matrix shall be computed and based on thresholds defined; issuers shall be classified as liquid, semi liquid and illiquid. For bonds thresholds are defined as up to 15 bps for liquid; >15-75 bps for semi-liquid; > 75 bps for illiquid. (Here, spread is computed as average spread of issuer over AAA Public Sector Undertakings / Financial Institutions / Banks matrix), For CP/ CD- up to 25 bps for liquid; >25- 50 bps for semiliquid; > 50 bps for illiquid. (Here, spread is computed as average spread of issuer over A1+/AAA CD Bank matrix).

The thresholds shall be periodically reviewed and updated having regard to the market.

The best classification (liquid being the best) from the above two criteria (trading volume and spread based) shall be considered as the final liquidity classification of the issuer. The above classification shall be carried out separately for money market instruments {CP/ CDs) and bonds.

5. Process for construction of spread matrix

Valuation agencies shall follow the below process in terms of calculating spreads and constructing the matrix:

Steps	Detailed Process
Step 1	Segmentation of corporates- The entire corporate sector is first categorised across following four sectors i.e. all the corporates will be catalogued under one of the below mentioned bucket: 1.Public Sector Undertakings / Financial Institutions / Banks; 2.Non-Banking Finance Companies -except Housing Finance Companies; 3. Housing Finance Companies; 4. Other Corporates
Step 2	Representative issuers - For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by the valuation agencies for only higher

	<p>rating {I.e. "AAA" or AA+). Benchmark/Representative Issuers will be identified basis high liquidity, availability across tenure in AAA/AA+ category and having lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector.</p> <p>It may not be possible to find representative issuers in the lower rated segments, however in case of any change in spread in a particular rating segment; the spreads in lower rated segments should be suitably adjusted to reflect the market conditions. In this respect, in case spreads over benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.</p>
Step 3	<p>Calculation of benchmark curve and calculation of spread –</p> <ol style="list-style-type: none"> 1. Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1month till 20 years and above. 2. Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3. In the event of no data related to trades/primary issuances in the securities of the representative issuer is available, polling shall be conducted from market participants 4. Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available trades/primaries/polls for respective maturity bucket over the Benchmark Issuer. 5. Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available

	for any issuer and respective benchmark movement will be given
Step 4	<p>1. The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances.</p> <p>2. In case of rating downgrade/credit event/change in liquidity or any other material event in Representative Issuers, new Representative Issuers will be identified. Also, in case there are two credit ratings, the lower rating to be considered.</p> <p>3. Residual tenure of the securities of representative issuers shall be used for construction of yield curve.</p>

Part B: Valuation of G-Secs {T- Bill, Cash management bills, G-Sec and SOL}

The following is the waterfall mechanism for valuation of Government securities:

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quote, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark
- Polling etc.

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

The threshold limit is applicable for aggregate dividend credited / paid in a financial year for all the Schemes. The same is to be computed at the PAN level. However, on account of practical difficulties involved due to the unique nature of mutual fund investments, different schemes involved and irregular frequency of dividend declaration, UTI Mutual

Fund shall deduct TDS from each dividend declared i.e. even when the dividend amount paid is less than Rs. 5,000/- or has not reached in aggregate the sum of Rs.5,000 threshold limit. In case of total TDS exceeding the actual tax liability of any investor, the investor can claim refund while filing income-tax return.

SEBI has also issued operational guidelines for Designated Depository Participants (DDPs) as per which the SEBI approved DDPs would grant registration to FPIs on behalf of SEBI and also carry out other allied activities including tax deduction/withholding in compliance under the FPI Regulations. FPIs are also advised to consult their DDPs on the taxation including TDS aspects.

5. Surcharge, Health & Education Cess:

The tax/TDS is to increase by applicable surcharge. Further, Health and Education Cess @ 4% is to be charged on amount of tax and surcharge.

TDS is subject to the DTAA (Double Taxation Avoidance Agreement) provisions.

Foreign Account Tax Compliance Act (FATCA)

Investment in the Units is also subject to various requirements/conditions under Foreign Account Tax Compliance Act (FATCA) of the United States of America with the objective of tackling tax evasion through obtaining information in respect of offshore financial accounts maintained by USA residents and citizens. India and USA have entered into Inter-Governmental Agreement (IGA) in July, 2015 which, inter alia, provides that the Indian FIs (including Mutual Funds) will provide necessary information to the Indian tax authorities, which will then be transmitted to USA periodically.

These developments will also enable the Indian tax authorities to automatically receive information of Indian residents who have stashed assets in foreign participating jurisdictions.

Common Reporting Standard (CRS)

To combat the problem of offshore tax evasion and avoidance and stashing of unaccounted money abroad requiring cooperation amongst tax authorities, the G20 and OECD countries have developed a Common Reporting Standard (CRS) on Automatic Exchange of Information (AEOI). India has joined Multilateral Competent Authority Agreement to implement to

implement Automatic Exchange of Information based on Common Reporting System (CRS) for automatic exchange of information. From the year 2017, amongst several other countries, India has started sharing tax information on automatic basis.

The CRS on AEOI requires the financial institutions of the “source” jurisdiction to collect and report information to their tax authorities about account holders “resident” in other countries, such information having to be transmitted “automatically” on yearly basis. The information to be exchanged relates not only to individuals but also to shell companies and trusts having beneficial ownership or interest in the “resident” countries. Further, the reporting needs to be done for a wide range of financial products, by a wide variety of financial institutions including banks, depository institutions, collective investment vehicles, mutual funds and insurance companies.

These are very wide in scope and obliges the treaty partners to exchange a wide range of financial information, including that about the ultimate controlling persons and beneficial owners of entities.

For implementation of the FATCA and CRS, amendments have been made to section 285BA of the Income Tax Act, 1961 and necessary rules and guidelines have been framed. Under the FATCA and CRS bulk taxpayer information will periodically be sent by the source country of income to the country of residence of the taxpayer.
