I. INTRODUCTION

A. RISK FACTORS

(i) Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- Axis Long Term Equity Fund is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

(ii) Scheme Specific Risk Factors:

By virtue of requirements under the ELSS, Units issued under Axis Long Term Equity Fund including the units issued under dividend reinvestment option will not be redeemed until the expiry of 3 (three) years from the date of their allotment. The ability of an investor to realise returns on investments in Axis Long Term Equity Fund is consequently restricted for the first three years. Redemption will be made prior to the expiry of the aforesaid 3 (three) years period only in the event of the death of a Unit Holder, subject to the Units having been held for a period of 1 (one) year from the date of their allotment.

Risks associated with investments in Equities

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks associated with investments in Fixed Income Securities

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds, and money market instruments and derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop,

such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a money market instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Risk associated with Securitized Debt

The Scheme may invest in domestic securitized debt such as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans, loans against consumer durables, etc. MBS are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties.

At present in Indian market, following types of loans are securitized:

1. Auto Loans (cars / commercial vehicles /two wheelers)
2. Residential Mortgages or Housing Loans
3. Consumer Durable Loans
4. Personal Loans

5. Corporate Loans

In terms of specific risks attached to securitization, each asset class would have different underlying risks. Residential Mortgages generally have lower default rates than other asset classes, but repossession becomes difficult. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Asset classes like personal loans, credit card receivables are unsecured and in an economic downturn may witness higher default. A corporate loan/receivable, depend upon the nature of the underlying security for the loan or the nature of the receivable and the risks correspondingly fluctuate.

The rating agencies define margins, over collateralisation and guarantees to bring risk in line with similar AAA rated securities. The factors typically analyzed for any pool are as follows:

- a. Assets securitized and Size of the loan: This indicates the kind of assets financed with the loan and the average ticket size of the loan. A very low ticket size might mean more costs in originating and servicing of the assets.
- b. Diversification: Diversification across geographical boundaries and ticket sizes might result in lower delinquency
- c. Loan to Value Ratio: Indicates how much % value of the asset is financed by borrower's own equity. The lower this value the better it is. This suggests that where the borrowers own contribution of the asset cost is high; the chances of default are lower.
- d. Average seasoning of the pool: This indicates whether borrowers have already displayed repayment discipline. The higher the number, the more superior it is.

The other main risks pertaining to Securitised debt are as follows:

Prepayment Risk: This arises when the borrower pays off the loan sooner than expected. When interest rates decline, borrowers tend to pay off high interest loans with money borrowed at a lower interest rate, which shortens the average maturity of ABS. However, there is some prepayment risk even if interest rates rise, such as when an owner pays off a mortgage when the house is sold or an auto loan is paid off when the car is sold.

Reinvestment Risk: Since prepayment risk increases when interest rates decline, this also introduces reinvestment risk, which is the risk that the principal can only be reinvested at a lower rate.

Risks associated with investments in Derivatives

The Mutual Fund may enter into derivatives transactions subject to Regulations and the ELSS Rules. The Scheme shall invest in Derivatives only when permitted under the ELSS Rules.

- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.
- The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility to the values.
- Investment in derivatives also requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.

- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- The option buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.
- The exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances and this could impact the value of the portfolio.
- The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price, as per extant regulations.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavorable) market price.
- Derivatives also carry a market liquidity risk where the derivatives cannot be sold (unwound) at prices that reflect the underlying assets, rates and indices.
- Where derivatives are used for hedging, such use may involve a basis risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.
- Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor.
- Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risks associated with transaction in Units through stock exchange(s)

In respect of transaction in Units of the Scheme through BSE and / or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

Risks associated with investing in foreign securities/overseas investments/offshore securities

Subject to rules in this behalf including ELSS Rules, and subject to relevant regulatory approvals, the Scheme may also invest in permitted foreign securities. The Scheme shall invest in Foreign Securities only when permitted under the ELSS Rules.

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.
- Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of such Scheme. To manage risks associated with foreign currency and interest [rate exposure, the Fund may use derivatives for efficient portfolio management and hedging and portfolio rebalancing and in accordance with conditions as may be stipulated under the Regulations and by RBI from time to time.
- Investment in Foreign Securities involves a currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Risks associated with Repo transactions in Corporate Bonds

The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However in repo transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over-collateralization (the value of the collateral being more than the repo amount).

Risks associated with Securities lending

The securities forming assets of the Scheme may be lent only if permitted under and in line with the prevailing securities lending and borrowing mechanism and ELSS Rules.

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, to comply with the terms of agreement entered into between the lenders of securities i.e. any scheme and the approved intermediary/counterparty. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary/counterparty to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Scheme may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risks associated with Short Selling

The Scheme may enter into short selling transactions, subject to SEBI and RBI Regulations and as and when permitted under the ELSS Guidelines. Short positions carry the risk of losing money and these losses may grow unlimited theoretically if the price of the stock increases without any limit. This may result in major loss to the Scheme. At times, the participants may not be able to cover their short positions, if the price increases substantially. If numbers of short sellers try to cover their position simultaneously, it may lead to disorderly trading in the stock and thereby can briskly escalate the price even further making it difficult or impossible to liquidate short position quickly at reasonable prices. In addition, short selling also carries the risk of inability to borrow the security by the participants thereby requiring the participants to purchase the securities sold short to cover the position even at unreasonable prices.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 Investors and no single Investor shall account for more than 25% of the corpus of the Scheme. The aforesaid conditions should be complied with in each calendar quarter on an average basis. In case the Scheme does not have a minimum of 20 Investors on an ongoing basis for each calendar quarter, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at Applicable NAV. If there is a breach of the 25% limit by any Investor over the quarter, a rebalancing period of one month would be allowed and thereafter the Investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic Redemption by the Mutual Fund at the Applicable NAV on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

- Prospective investors should study this Scheme Information Document and Statement of Additional Information carefully in its entirety and should not construe the contents hereof as advice relating to legal, taxation, financial, investment or any other matters and are advised to consult their legal, tax, financial and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before making a decision to invest/redeem/hold Units.
- The Scheme related documents i.e. SID/ KIM/ SAI or the units of the Fund are not registered in any jurisdiction including the United States of America nor in any provincial/territorial jurisdiction in Canada. The distribution of the Scheme related document in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of the Scheme related documents are required to inform themselves about, and to observe any such restrictions. No persons receiving a copy of this Scheme related documents or any accompanying application form in such jurisdiction may treat these Scheme related documents or such application form as constituting an invitation to them to subscribe for units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance with any registration or other legal requirements. Accordingly the Scheme related documents do not constitute an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation as per applicable law.
- The AMC, Trustee or the Mutual Fund have not authorized any person to issue any advertisement or to give any information or to make any representations, either oral or written, other than that contained in this Scheme Information Document or the Statement of Additional Information or as is provided by the AMC in connection with this offering. Prospective investors are advised not to rely upon any information or representation not incorporated in the Scheme Information Document or Statement of Additional Information or provided by the AMC as having been authorized by the Mutual Fund, the AMC or the Trustee.
- Redemption due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise due to such redemptions.
- The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up for the reasons and in the manner provided in 'Statement of Additional Information'.

- The Scheme has been framed in accordance with the ELSS Rules and other prevailing laws. The tax benefits described in this Scheme Information Document and Statement of Additional Information are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India as on the date of this Scheme Information Document and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit holder is advised to consult his / her own professional tax advisor.
- The Mutual Fund may disclose details of the investor's account and transactions thereunder to those intermediaries whose stamp appears on the application form or who have been designated as such by the investor. In addition, the Mutual Fund may disclose such details to the bankers, as may be necessary for the purpose of effecting payments to the investor. The Fund may also disclose such details to regulatory and statutory authorities/bodies as may be required or necessary.
- In case the AMC or its Sponsor or its Shareholders or their affiliates/associates or group companies make substantial investment, either directly or indirectly in the Scheme redemption of Units by these entities may have an adverse impact on the performance of the Scheme. This may also affect the ability of the other Unit holders to redeem their Units.
- As the liquidity of the Scheme investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Fund for Redemption of Units may be significant in the event of an inordinately large number of Redemption Requests (subject to lock in) or of a restructuring of the Scheme portfolio. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances - please refer to the paragraph "Suspension/ Restriction on Redemption of Units of the Scheme".
- Pursuant to the provisions of Prevention of Money Laundering Act, 2002, if after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, on failure to provide required documentation, information, etc. by the Unit holder the AMC shall have absolute discretion to report such suspicious transactions to FIU-IND and / or to freeze the folios of the investor(s), reject any application(s) / allotment of Units.
- Investor Protection: The Scheme is designed to support longer- term investment and active trading is discouraged. Short term or excessive trading into and out of the Scheme may affect its performance by disrupting portfolio management strategies and by increasing expenses. The Fund and the distributors may refuse to accept applications for Purchase, especially where transactions are deemed disruptive, particularly from market timers or investors who, in their opinion, have a pattern of short term or excessive trading or whose trading has been or may be disruptive for the Scheme.

If in the opinion of the AMC, a Unit holder is indulging in short term or excessive trading as above, it shall, under powers delegated by the Trustee, have absolute discretion to reject any application, prevent further transaction by the Unit holder or redeem the Units held by the Unit holder at any time prior to the expiry of 30 Business Days from the date of the application.

Floating rate debt instruments are instruments issued by Central / state governments, corporates, PSUs, etc. with interest rates that are reset periodically.

Securitized Assets

Securitization is a structured finance process which involves pooling and repackaging of cashflow producing financial assets into securities that are then sold to investors. They are termed as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are backed by other assets such as credit card, automobile or consumer loan receivables, retail installment loans or participations in pools of leases. Credit support for these securities may be based on the underlying assets and/or provided through credit enhancements by a third party. MBS is an asset backed security whose cash flows are backed by the principal and interest payments of a set of mortgage loans. Such Mortgage could be either residential or commercial properties. ABS/MBS instrument reflect the undivided interest in the underlying assets and do not represent the obligation of the issuer of ABS/MBS or the originator of underlying receivables. Securitization often utilizes the services of SPV.

Pass through Certificate (PTC)

Pay through or other Participation Certificates represents beneficial interest in an underlying pool of cash flows. These cash flows represent dues against single or multiple loans originated by the sellers of these loans. These loans are given by banks or financial institutions to corporates. PTCs may be backed, but not exclusively, by receivables of personal loans, car loans, two wheeler loans and other assets subject to applicable regulations.

The following are certain additional disclosures w.r.t. investment in securitized debt:

1. How the risk profile of securitized debt fits into the risk appetite of the Scheme

Securitized debt is a form of conversion of normally non-tradable loans to transferable securities. This is done by assigning the loans to a special purpose vehicle (a trust), which in turn issues Pass-Through-Certificates (PTCs). These PTCs are transferable securities with fixed income characteristics. The risk of investing in securitized debt is similar to investing in debt securities. However, it differs in two respects.

Typically, the liquidity of securitized debt is less than similar debt securities. For certain types of securitized debt (backed by mortgages, personal loans, credit card debt, etc.), there is an additional pre-payment risk. Pre-payment risk refers to the possibility that loans are repaid before they are due, which may reduce returns if the re-investment rates are lower than initially envisaged.

Because of these additional risks, securitized debt typically offers higher yields than debt securities of similar credit rating and maturity. If the fund manager judges that the additional risks are suitably compensated by the higher returns, he may invest in securitized debt up to the limits specified in the asset allocation table above.

2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc.

The originator is the person who has initially given the loan. The originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). An analysis of the originator is especially important in case of retail loans as this affects the credit quality and servicing of the PTC. The key risk is that of the underlying assets and not of the originator. For example, losses or performance of earlier issuances does not indicate quality of current series. However, such past performance may be used as a guide to evaluate the loan standards, servicing capability and performance of the originator.

Originators may be: Banks, Non Banking Finance Companies, Housing Finance Companies, etc. The fund manager / credit analyst evaluates originators based on the following parameters

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Company specific factors

In addition, a detailed review and assessment of rating rationale is done including interactions with the originator as well as the credit rating agency.

The following additional evaluation parameters are used as applicable for the originator / underlying issuer for pool loan and single loan securitization transactions:

- Default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios of the ultimate borrower (for single-sell downs) – both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of reschedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

3. Risk mitigation strategies for investments with each kind of originator

An analysis of the originator is especially important in case of retail loans as the size and reach affects the credit quality and servicing of the PTC. In addition, the quality of the collection process, infrastructure and follow-up mechanism; quality of MIS; and credit enhancement mechanism are key risk mitigants for the better originators / servicers.

In case of securitization involving single loans or a small pool of loans, the credit risk of the underlying borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to determine the credit risk. The credit analyst looks at ageing (i.e. how long the loan has been with the originator before securitization) as one way of evaluating the performance potential of the PTC. Securitization transactions may include some risk mitigants (to reduce credit risk). These may include interest subvention (difference in interest rates on the underlying loans and the PTC serving as margin against defaults), overcollateralization (issue of PTCs of lesser value than the underlying loans, thus even if some loans default, the PTC continues to remain protected), presence of an equity / subordinate tranche (issue of PTCs of differing seniority when it comes to repayment - the senior tranches get paid before the junior tranche) and / or guarantees.

4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to determine the credit risk.

The credit analyst looks at ageing (i.e. how long the loan has been with the originator before securitization) as one way of judging the performance potential of the PTC. Additional risk mitigants may include interest subvention, over collateralization, presence of an equity / subordinate tranche and / or guarantees. The credit analyst also uses analyses by credit rating agencies on the risk profile of the securitized debt.

Currently, the following parameters are used while evaluating investment decision relating to a pool securitization transaction. The Investment Review Committee may revise the parameters from time to time.

Characteristics/Type of Pool	Mortgage Loan	Commercial Vehicle and Construction Equipment	CAR	2 wheelers	Micro Finance Pools *	Personal Loans *	Single Sell Downs	Others
Approximate Average maturity (in Months)	Up to 10 years	Up to 3 years	Up to 3 years	Up to 3 years	NA	NA	Refer Note 1	Refer Note 2

---------------------------------	-----	-----	-----	-----	----	----	---	---

* Currently, the Scheme will not invest in these types of securitized debt

Note 1: In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. The investment limits applicable to the underlying borrower are applied to the single loan sell-down.

Note 2: Other investments will be decided on a case-to-case basis

The credit analyst may consider the following risk mitigating measures in his analysis of the securitized debt:

- Size of the loan
- Average original maturity of the pool
- Loan to Value Ratio
- Average seasoning of the pool
- Default rate distribution
- Geographical Distribution
- Credit enhancement facility
- Liquid facility
- Structure of the pool

5. Minimum retention period of the debt by originator prior to securitization

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized. The minimum holding period depends on the tenor of the securitization transaction. The Scheme will invest in securitized debts that are compliant with the laws and regulations.

6. Minimum retention percentage by originator of debts to be securitized

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenor and structure of the securitization transaction. The Fund will invest in securitized debts that are compliant with the laws and regulations.

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

The key risk is securitized debt relates to the underlying borrowers and not the originator. In a securitization transaction, the originator is the seller of the debt(s) and the fund is the buyer. However, the originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). As the originators may also invest in the scheme, the fund manager shall ensure that the investment decision is based on parameters as set by the Investment Review Committee (IRC) of the Asset Management Company and IRC shall review the same at regular interval.

8. The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The fund management team including the credit analyst has the experience to analyze securitized debt. In addition, credit research agencies provide analysis of individual instruments and pools. On an on-going basis (typically monthly) the servicer provides

reports regarding the performance of the pool. These reports would form the base for ongoing evaluation where applicable. In addition, rating reports indicating rating changes would be monitored for changes in rating agency opinion of the credit risk.

When issued security

When, as and if issued' (commonly known as **"when-issued" (WI) security**) refers to a security that has been authorized for issuance but not yet actually issued. WI trading takes place between the time a new issue is announced and the time it is actually issued. All "when issued" transactions are on an "if" basis, to be settled if and when the actual security is issued.

SEBI has on April 16, 2008 in principle allowed Mutual Funds to undertake 'When Issued (WI)' transactions in Central Government securities, at par with other market participants.

Open Position in the 'WI' market are subject to the following limits:

Category	Reissued Security	Newly Issued Security
Non-PDs	Long Position, not exceeding 5 percent of the notified amount.	Long Position, not exceeding 5 percent of the notified amount.

The Scheme may invest, if and to the extent permissible under the Regulations and the ELSS Rules, in derivative instruments

Investment in Equity Derivatives (as and when permitted)

Futures:

Futures are exchange-traded contracts to sell or buy financial instruments for future delivery at an agreed price. There is an agreement to buy or sell a specified quantity of financial instrument on a designated future date at a price agreed upon by the buyer and seller at the time of entering into a contract. To make trading possible, the exchange specifies certain standardized features of the contract. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

SEBI has permitted futures contracts on indices and individual stocks with maturity of 1 month, 2 months and 3 months on a rolling basis. The futures contracts are settled on last Thursday (or immediately preceding trading day if Thursday is a trading holiday) of each month. Currently, the futures are settled in cash, the final settlement price is the closing price of the underlying stock(s)/index.

Options:

Option is a contract which provides the buyer of the option (also called holder) the right, without the obligation, to buy or sell a specified asset at the agreed price on or upto a particular date. For acquiring this privilege, the buyer pays premium (fee) to the seller. The seller on the other hand has the obligation to buy or sell specified asset at the agreed price and for this obligation he receives premium. The premium is determined considering number of factors such as the market price of the underlying asset/security, number of days to expiry, risk free rate of return, strike price of the option and the volatility of the underlying asset. Option contracts are of two types viz:

Call Option - The option that gives the buyer the right but not the obligation to buy specified quantity of the underlying asset at the strike price is a call option. The buyer of the call option (known as the holder of call option) can call upon the seller of the option (writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry of the option.

The seller (writer of the option) on the other hand has the obligation to sell the underlying asset if the buyer of the call option decides to exercise his option to buy.

Put Option – The option that gives the buyer the right but not the obligation to sell is called put option. A Put option gives the holder (buyer) the right to sell specified quantity of the underlying asset at the strike price. The seller of the put option (one who is short Put) however, has the obligation to buy the underlying asset at the strike price if the buyer decides to exercise his option to sell.

There are two kind of options based on the date of exercise of right. The first is the European Option which can be exercised only on the maturity date. The second is the American Option which can be exercised on or before the maturity date.

Foreign Securities (as and when permitted)

The Scheme may also invest in suitable investment avenues in foreign securities in overseas financial markets for the purpose of diversification, commensurate with the Scheme objectives and subject to necessary stipulations by SEBI / RBI. Towards this end, the Mutual Fund may also appoint overseas investment advisors and other service providers, to the extent permissible under the Regulations.

The Scheme may, with the approval of SEBI / RBI, where required invest in:

- ADRs (American Depositary Receipts)/ GDRs (Global Depositary Receipts) issued by Indian or foreign companies
- Equity of overseas companies listed on recognized stock exchanges overseas
- Initial and follow on public offerings for listing at recognized stock exchanges overseas
- Derivatives traded on recognized stock exchanges overseas only for hedging and portfolio balancing with underlying as securities
- Units/securities issued by overseas mutual funds or unit trusts registered with overseas regulators and investing in (a) aforesaid securities, or (b) unlisted overseas securities (not exceeding 10% of their net assets).

As per SEBI circular no. SEBI/IMD/CIR No.7/104753/07 dated September 26, 2007, mutual funds can make overseas investments subject to a maximum of US \$300 million or such limits as may be prescribed by SEBI from time to time. Subject to the approval of RBI / SEBI and conditions as may be prescribed by them, the Mutual Fund may open one or more foreign currency accounts abroad either directly, or through the custodian/sub-custodian, to facilitate investments and to enter into/deal in forward currency contracts, currency futures, interest rate futures / swaps, currency options for the purpose of hedging the risks of assets of a portfolio or for its efficient management. However, the use of such instruments shall be as permitted from time to time. All the requirement of the SEBI circular dated September 26, 2007, would be adhered to by the AMC for investment in foreign securities.

Investment in overseas securities shall be made in accordance with the requirements stipulated by SEBI and RBI from time to time.

Units of Mutual Fund schemes The Scheme may invest in other schemes managed by the AMC or in the schemes of any other mutual funds in conformity with the investment objective of the Scheme and in terms of the prevailing SEBI (MF) Regulations.

Short Term Deposits

Pending deployment of funds as per the investment objective of the Scheme, the funds may be parked in short term deposits of the Scheduled Commercial Banks, subject to guidelines and limits specified by SEBI.

The securities / instruments mentioned above and such other securities the Scheme is permitted to invest in could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity.

The securities may be acquired through initial public offering (IPOs), secondary market, private placement, rights offers or negotiated deals. Further investments in debentures, bonds and other fixed income securities will be in instruments which have been assigned investment grade rating by the Credit Rating Agency.

Investment in unrated debt instruments shall be subject to complying with the provisions of the Regulations and within the limit as specified in Schedule VII to the Regulations. Pursuant to SEBI circular no. MFD/CIR/9/120/2000 dated November 24, 2000, the AMC may constitute committee(s) to approve proposals for investments in unrated debt instruments. The AMC Board and the Trustee shall approve the detailed parameters for such investments. However, in case any unrated debt security does not fall under the parameters, the prior approval of Board of AMC and Trustee shall be sought.

For applicable regulatory investment limits please refer paragraph "Investment Restrictions."

Details of various derivative instruments along with derivative strategies have been provided under the paragraph "Derivatives Strategy"

The Fund Manager may invest in any other security as maybe permitted from time to time and which are in line with the investment objectives of the Scheme.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme will invest in a diversified portfolio of strong growth companies with sustainable business models. Though the benchmark is S&P BSE-200, the investments will not be limited to the companies constituting the benchmark.

The portfolios will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a fundamentals based research process to analyse the appreciation potential of each stock in its universe. The universe of stocks is carefully selected to include companies having robust business models and enjoying sustainable competitive advantages as compared to their competitors. The Fund will have the flexibility to invest across the market capitalization spectrum.

The Scheme will endeavour to remain fully invested in equity and equity-related instruments at all times.

Portfolio Turnover

The fund manager normally will buy stocks which he believes will deliver superior earnings growth over a one to two-year period and hence the portfolio turnover is not expected to be very high. However, since the Scheme is an open-ended scheme, it is expected that there would be a number of subscriptions and redemptions (subject to lock in period) on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to

estimate with reasonable accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover

Risk Control:

Risk is an inherent part of the investment function. Effective Risk Management is critical to Fund Management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of SEBI regulations. AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools. Further, the AMC has implemented Bloomberg Portfolio Management System as Front Office System (FOS) for tracking risk. The system has inbuilt feature which enables the Fund Manager calculate various risk ratios, average duration, etc and analyze the same.

DERIVATIVES STRATEGY

The Scheme may invest in various derivative instruments which are permissible under the applicable regulations. Such investments shall be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index).

Derivatives are financial contracts of pre-determined fixed duration, like stock futures/options and index futures and options, whose values are derived from the value of an underlying primary financial instrument such as: interest rates, exchange rates, commodities, and equities.

Derivatives can be either exchange traded or can be over the counter (OTC). Exchange traded derivatives are listed and traded on stock exchanges whereas OTC derivative transactions are generally structured between two counterparties.

The objectives of the various strategies include earning option premium/ hedge stock / portfolio against market gyrations.

The risks associated with derivatives are similar to those associated with underlying investments. The additional risks of using derivative strategies could be on account of:

- Illiquidity;
- Potential mis - pricing of the Futures/Options;
- Lack of opportunity;
- Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates);
- Cost of hedge can be higher than adverse impact of market movements;
- An exposure to derivatives in excess of the hedging requirements can lead to losses;
- An exposure to derivatives can also limit the profits from a genuine investment transaction;
- The prices which are seen on the screen need not be the same at which execution will take place.
- In case of option writing, the downside of the strategy could be more than the option premium earned. As per the extant SEBI Regulations / circulars, Mutual Funds cannot write options.

For detailed risks associated with use of derivatives, please refer paragraph "Scheme Specific Risk Factors". Exchange traded derivatives Contracts in stocks and indices in India are currently cash settled at the time of maturity.

Derivatives allowed for mutual funds are only exchange traded and not OTC.

Concepts and Examples of derivatives which may be used by the fund manager:

Futures

Futures (Index & Stocks) are forward contracts traded on the exchanges & have been introduced both by BSE and NSE. Generally futures of 1 month (near month), 2 months (next month) and 3 months (far month) are presently traded on these exchanges. These futures expire on the last working Thursday of the respective months.

Illustration with Index Futures

In case the Nifty 50 near month future contract is trading at say, Rs. 3,510, and the fund manager has a view that it will depreciate going forward; the Scheme can initiate a sale transaction of Nifty 50 futures at Rs. 3,510 without holding a portfolio of equity stocks or any other underlying long equity position. Once the price falls to Rs. 3,400 after say, 20 days,

the Scheme can initiate a square-up transaction by buying the said futures and book a profit of Rs. 110.

Correspondingly, if the fund manager has a positive view he can initiate a long position in the index / stock futures without an underlying cash/ cash equivalent subject to the extant regulations.

There are futures based on stock indices as mentioned above as also futures based on individual stocks. The profitability of index /stock future as compared to an individual security will inter-alia depend upon:

- The carrying cost,
- The interest available on surplus funds, and
- The transaction cost.

Example of a typical future trade and the associated costs

Particulars	Index Future	Actual Purchase of Stocks
Index at the beginning of the month	3500	3500
Price of 1 month future	3510	
A. Execution cost: Carry and other index future costs	10	
B. Brokerage cost: Assumed at 0.2% of Index Future	7.02	8.75
0.25% for spot Stocks		
C. Gains on surplus fund: (Assumed 8% p.a. return on 85% of the money left after paying 15% margin) (8%*3500*85%*30 days/365)	19.56	0
Total Cost (A+B-C)	-2.54	8.75

Some strategies that employ stock /index futures and their objectives:

(a) Arbitrage

(1) Selling spot and buying future: In case the Scheme holds the stock of a company "A" at say Rs. 100 while in the futures market it trades at a discount to the spot price say at Rs. 98, then the Scheme may sell the stock and buy the futures.

On the date of expiry of the stock future, the Scheme may reverse the transactions (i.e. buying at spot & selling futures) and earn a risk-free Rs. 2 (2% absolute) on its holdings without any dilution of the view of the fund manager on the underlying stock.

Further, the Scheme can still benefit from any movement of the price in the upward direction, i.e. if on the date of expiry of the futures, the stock trades at Rs. 110 which would be the price of the futures too, the Scheme will have a benefit of Rs 10 whereby the Scheme gets the 10% upside movement together with the 2% benefit on the arbitrage and thus getting a total return of 12%. The corresponding return in case of holding the stock would have been 10%.

Note: The same strategy can be replicated with a basket of Nifty- 50 stocks (Synthetic Nifty) and the Nifty future index.

(2) Buying spot and selling future: Where the stock of a company "A" is trading in the spot market at Rs. 100 while it trades at Rs. 102 in the futures market, then the Scheme may buy the stock at spot and sell in the futures market thereby earning Rs. 2.

Buying the stock in cash market and selling the futures results into a hedge where the Scheme has locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts when there is a convergence between the cash market and the futures market. This convergence enables the Scheme to generate the arbitrage return locked in earlier.

(b) Buying/ Selling Stock future:

When the Scheme wants to initiate a long position in a stock whose spot price is at say, Rs.100 and futures is at 98, then the Scheme may just buy the futures contract instead of the spot thereby benefiting from a lower cost.

In case the Scheme has a bearish view on a stock which is trading in the spot market at Rs.98 and the futures market at say Rs. 100, the Scheme may subject to regulations, initiate a short position in the futures contract. In case the prices align with the view and the price depreciates to say Rs. 90, the Scheme can square up the short position thereby earning a profit of Rs.10 vis a vis a fall in stock price of Rs 8.

(c) Hedging:

The Scheme may use exchange-traded derivatives to hedge the equity portfolio. Both index and stock futures and options may be used to hedge the stocks in the portfolio.

(d) Alpha Strategy:

The Scheme will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying a bank stock and selling Bank Nifty future.

Execution of these strategies depends upon the ability of the fund manager to identify and execute based on such opportunities. These involve significant uncertainties and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Option Contracts (Stock and Index)

An Option gives the buyer the right, but not the obligation, to buy (call) or sell (put) a stock at an agreed-upon price during a certain period of time or on a specific date.

Options are used to manage risk or as an investment to generate income. The price at which underlying security is contracted to be purchased or sold is called the Strike Price. Options that can be exercised on or before the expiration date are called American Options while, Options that can be exercised only on the expiration date are called European Options.

Options Risk / Return Pay-off Table

	Stock / Index Options	Buy Call	Sell Call	Buy Put	Sell Put
1	View on underlying	Positive	Negative	Negative	Positive
2	Premium	Pay	Receive	Pay	Receive
3	Risk Potential	Limited to premium paid	Unlimited	Limited to premium paid	Unlimited
4	Return Potential	Unlimited	Premium Received	Unlimited	Premium Received

Option contracts are of following two types - Call and Put.

Call Option: A call option gives the buyer, the right to buy specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of call option however, has the obligation to sell the underlying asset if the buyer of the call option decides to exercise the option to buy.

Put Option: A put option gives the buyer the right to sell specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of put option however, has the obligation to buy the underlying asset if the buyer of the put option decides to exercise his option to sell.

Index Options / Stock Options

Index options / Stock options are termed to be an efficient way of buying / selling an index/stock compared to buying / selling a portfolio of physical shares representing an index for ease of execution and settlement. The participation can be done by buying / selling either Index futures or by buying a call/put option.

The risk are also different when index /stock futures are bought/sold visa- a- vis index/ stocks options as in case of an index future there is a mark to market variation and the risk is much higher as compared to buying an option, where the risk is limited to the extent of premium paid.

The illustration below explains how one can gain using Index call / put option. These same principles of profit / loss in an Index option apply in totality to that for a stock option.

Call Option

Suppose an investor buys a Call option on 1 lot of Nifty 50(Lot Size: 50 units)

- Nifty index (European option).
- Nifty 1 Lot Size: 50 units
- Spot Price (S): 3500
- Strike Price (x): 3550 (Out-of-Money Call Option)
- Premium: 100

Total Amount paid by the investor as premium $[50 \times 100] = \text{Rs. } 5,000$

There are two possibilities i.e. either the index moves up over the strike price or remains below the strike price.

Case 1- The index goes up

- An investor sells the Nifty Option described above before expiry:

Suppose the Nifty 50 Index moves up to 3600 in the spot market and the premium has moved to Rs 200 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty call option as the option now is In the Money.

His gains are as follows:

- Nifty Spot: 3600
- Current Premium: Rs.200
- Premium paid: Rs.100
- Net Gain: Rs.200- Rs.100 = Rs.100 per unit
- Total gain on 1 lot of Nifty (50 units) = Rs.5,000 (50*100)

In this case the premium of Rs.200 has an intrinsic value of Rs.50 per unit and the remaining Rs.150 is the time value of the option.

- An investor exercises the Nifty Option at expiry
Suppose the Nifty index moves up to 3700 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the Nifty call option as the option now is In The Money.

His gains are as follows:

- Nifty Spot: 3700
- Premium paid: Rs.100
- Exercise Price: 3550
- Receivable on exercise: $3700 - 3550 = 150$
- Total Gain: Rs.2500 $\{(150 - 100) * 50\}$

In this case the realised gain is only the intrinsic value, which is Rs.50, and there is no time value.

Case 2 - The Nifty index moves to any level below 3550

Then the investor does not gain anything but on the other hand his loss is limited to the premium paid:

Net Loss is Rs.5000 (Loss is capped to the extent of Premium Paid)

(Rs 100 Premium paid*Lot Size: 50 units).

Put Option

Suppose an investor buys a Put option on 1 lot of Nifty 50.

- Nifty 1 Lot Size: 50 units
- Spot Price (S): 3500
- Strike Price (x): 3450 (Out-of-Money Put Option)
- Premium: 30
- Total Amount paid by the investor as premium $[50 * 30] = \text{Rs.1500}$

There are two possibilities i.e. either the index moves over the strike price or moves below the strike price.

Let us analyze these scenarios.

Case 1 - The index goes down

- An investor sells the Nifty Option before expiry:

Suppose the Nifty 50 index moves down to 3400 in the spot market and the premium has moved to Rs. 80 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty Put Option as the option now is In The Money. His gains are as follows:

- Nifty Spot: 3400
- Premium paid: Rs.30
- Net Gain: Rs.80 - Rs.30 = Rs.50 per unit
- Total gain on 1 lot of Nifty (50 units) = Rs.2500 (50*50)

In this case the premium of Rs.80 has an intrinsic value of Rs.50 per unit and the remaining Rs.30 is the time value of the option.

An investor exercises the Nifty Option at expiry (It is an European Option)

Suppose the Nifty index moves down to 3400 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the Nifty Put Option as the option now is In The Money.

His gains are as follows:

- Nifty Spot: 3400
- Premium paid: Rs.30
- Exercise Price: 3450
- Gain on exercise: $3450 - 3400 = 50$
- Total Gain: Rs.1000 $\{(50 - 30) * 50\}$

In this case the realised amount is only the intrinsic value, which is Rs.50, and there is no time value in this case.

Case 2 - If the Nifty 50 index stays over the strike price which is 3450, in the spot market then the investor does not gain anything but on the other hand his loss is limited to the premium paid.

- Nifty Spot: >3450
- Net Loss Rs.1500 (Loss is capped to the extent of Premium Paid)
(Rs 30 Premium paid * Lot Size: 50 units).

2	The Scheme shall not write options or purchase instruments with embedded written options.
3	The total exposure related to option premium paid shall not exceed 20% of the net assets of the Scheme.
4	Exposure due to hedging positions may not be included in the above mentioned limits subject to the following: <ol style="list-style-type: none"> a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains. b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1. c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged. d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
5	Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.
6	Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

	Position	Exposure
	Long Future	Futures Price * Lot Size * Number of Contracts
	Short Future	Futures Price * Lot Size * Number of Contracts
	Option bought	Option Premium Paid * Lot Size * Number of Contracts.
7	The Scheme may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the Scheme. Exposure to a single counterparty in such transactions shall not exceed 10% of the net assets of the Scheme.	

17. The Scheme shall participate in repos in corporate debt securities as per the guidelines issued by SEBI and/ or RBI from time to time and the guidelines framed by the Board of Directors of Trustee Company and the Asset Management Company, from time to time.

At present the following conditions and norms shall apply to repo in corporate debt securities:

- (i) The gross exposure of the Scheme to repo transactions in corporate debt securities shall not be more than 10 % of the net assets of the Scheme.
- (ii) The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt and derivatives shall not exceed 100% of the net assets of the Scheme.
- (iii) The Scheme shall participate in repo transactions only in AA and above rated corporate debt securities.
- (iv) The Scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.
- (v) Counterparty selection & credit rating
The counterparty must be an acceptable counterparty for debt transactions. The Mutual Fund follows a counterparty empanelment process for fixed income transactions and the same shall be used for selection of counterparties for corporate bond repos. All repo transactions in corporate bonds will be governed by a repo agreement as specified by FIMMDA and / or other specified authorities.
- (vi) Collateral tenor & quality
Bonds with a minimum original maturity of 1-year and a minimum rating of AAA shall be eligible for repo. The exposure limit/investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate bonds.
- (vii) Applicable haircuts
Currently mutual funds are permitted to carry out repo transactions in government securities without any haircuts. The Reserve Bank of India has notified a minimum haircut based on rating of the corporate bond as below. In addition, the Fixed Income and Money Market Dealers Association (FIMMDA) would maintain a rating-haircut matrix on an ongoing basis.

Rating	AAA		
Minimum haircut	10 %		

The haircuts seek to protect the lender of funds from the event of the counterparty failing to honor the repurchase leg of the repo. In such a circumstance, the Fund would suffer a loss if the value of the collateral

depreciates by more than the haircut. The fall in the value of the collateral could be on account of higher yields and/ or deterioration of credit quality.

As the typical tenor of repos is short (typically overnight), the haircuts represent a relatively high degree of safety in relation to the interest rate risk on the collateral. The risk of collateral depreciation based on historical volatility is given in the table below:

Bond Tenor (yrs)	1	3	5	10
Price Volatility (%) (annualized)	0.6	1.2	1.7	3.4
Repo Tenor	Number of standard deviations needed to lose 10%			
1 day	258	136	94	48
7 days	98	52	36	18

In the above table, the price volatility of a 10-year bond is about 3.4% annualized. That is a 10% price move represents nearly a 3-sigma event on an annualized basis. For overnight tenors, this represents a 48-sigma event (for comparison a 6-sigma event occurs about once in a million observations).

It is apparent that the haircuts stipulated by RBI are more than sufficient to mitigate interest rate risk. Credit event risk remains (the collateral could default during the tenor of the repo). This risk is to be mitigated by ensuring that the collateral is acceptable from a credit point of view.

The exposure limit/ investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate bonds.

The Scheme will comply with the other Regulations applicable to the investments of Mutual Funds from time to time.

Further, Investments in derivative shall be made as and when permitted. All the investment restrictions will be applicable at the time of making investments.

The AMC/Trustee may alter these above stated restrictions from time to time to the extent the SEBI Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective.

Apart from the Investment Restrictions prescribed under the Regulations, internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities.

Foreign Account Tax Compliance Act ('FATCA') and Common Reporting Standards (CRS) requirements:

As a part of various ongoing tax and regulatory developments around the globe such as Foreign Account Tax Compliance Act ('FATCA') and Common Reporting Standard ('CRS'), financial institutions like Axis Mutual Fund ('Axis MF') are being cast with additional investor and counterparty account related due diligence requirements.

FATCA is a United States of America ("U.S.") tax initiative that requires all financial institutions to report financial transactions of U.S. persons including entities in which U.S. persons hold a substantial ownership, etc. to the relevant tax authorities. It was introduced by the United States Department of Treasury and the US Internal Revenue Service ("IRS") The purpose of FATCA is to prevent tax evasion by US citizens and residents (US Persons)

through use of offshore accounts. FATCA obligates financial institutions (FIs), including Indian financial institutions to provide information on the accounts of / to report accounts held by specified US Persons. FATCA requires enhanced due diligence procedures by the FI so as to identify US reportable accounts. With respect to individuals, the US reportable accounts would cover those with US citizenship or US residency.

Further, similar to FATCA, G20 and OECD countries have released a "Standard for Automatic Exchange of Financial Account Information in Tax Matters", commonly known as the CRS on Automatic Exchange of Information (AEOI). CRS mandates automatic tax information exchange regarding accounts of reportable persons between the CRS compliant jurisdictions.

The Indian Government signed an Inter-Governmental Agreement ("IGA") with the U.S. on July 9, 2015 to implement FATCA in India. In addition, India also signed the OECD's Model Competent Authority Agreement for tax information sharing in accordance with multilateral Common Reporting Standard ("CRS") on June 3, 2015. India had committed to implement CRS and the same has been implemented from January 1, 2016. Towards this, the Central Board of Direct Taxes has inserted Section 285BA of the Income Tax Act, 1961 along with Rules 114F to 114H (FATCA-CRS Rules), as part of the Income-tax Rules, 1962. These Rules require Indian financial institutions such as the Banks, Mutual Funds, etc. to seek additional personal, tax and beneficial owner information and certain certifications and documentation from all our investors and counterparties. According to the FATCA-CRS Rules, financial institutions in India are required to report tax information about account holders that tax resident of U.S. and other foreign countries, to the CBDT/ Indian Government which will, in turn, will relay that information to the IRS and governments of other foreign countries.

These developments have resulted in compliance and reporting obligations on Financial Institutions like Axis MF. In relevant cases, information will have to be reported to tax authorities i.e. CBDT. Towards compliance, the Fund may also be required to provide information to any institutions such as withholding agents for the purpose of ensuring appropriate withholding from the account or any proceeds in relation thereto. Axis MF has taken appropriate measures in order to become FATCA and CRS compliant, with effect from the applicable date as per applicable laws / rules/ regulations. As may be required by domestic or overseas regulators/ tax authorities, we may also be constrained to withhold and pay out any sums from your account or close or suspend your account(s). Axis MF may also have to comply with other similar laws as and when applicable.

SEBI issued its circular no. CIR/MIRSD/2/2015 dated August 26, 2015 inter-alia advising intermediaries to take necessary steps to ensure compliance with the requirements specified in the rules and guidelines specified by the Government of India. AMFI also issued its best practices guidelines circular no. 63/2015-16 dated September 18, 2015 on this matter. The AMC and the Mutual Fund are required to adhere to various requirements inter-alia including submission of various information / details relating to the investors in the schemes of the mutual fund, to authorities, as specified under the applicable laws.

Accordingly, the following aspects need to be adhered to:

- With effect from November 1, 2015 all investors will have to mandatorily provide the information and declarations pertaining to FATCA/CRS for all new accounts opened, failing which the application / transaction request shall be liable to be rejected.
- For all new accounts opened by investors, from September 1, 2015 till October 31, 2015, MFs need to obtain relevant FATCA declarations. These details / certification need to be obtained by December 31, 2015, particularly in cases where, after Indicia search, a positive match is found with any US indicia. If certification is not provided by an investor or the reasonableness of self-certification cannot be confirmed, the account is treated as reportable.
- Investors are requested to note that under the alternative procedure provided in Rule 114H(8) of the Income-tax Rules, 1962, the financial institutions were required to obtain FATCA/CRS self-certification and carry out due diligence in respect of all individual and entity accounts opened from 1st July 2014 to 31st August 2015. Such self-certification and documentation was required to be obtained by the financial institutions by an extended timeline of 31st August 2016. In the event that such self-certification were not received within this timeline, financial institutions were required to close the account and if the account were found to be a "reportable account", report the same. In view of the difficulties highlighted by stakeholders in complying with the provision for "closure" of financial accounts, the Ministry of Finance, Government of India vide Press Release dated 31st August 2016 extended the time line for closure (from 31 August 2016) until further notification.

Further to this, the Ministry of Finance, Government of India vide its Press release dated April 11, 2017 directed financial institutions to obtain the self-certification by April 30, 2017, failing which the accounts would need to be blocked. The transactions in such blocked folios would, be permitted only once the self-certification is obtained and due diligence completed. Investors are advised to complete their self-certification at the earliest to prevent being inconvenienced on account of blocking of any folio(s).

Prospective investors and Unit holders will therefore be required to comply with the request of the Fund to furnish such information / documentation / declarations as and when deemed necessary by the Investment Manager in accordance with Applicable Laws. In case prospective investor / Unit holder fails to furnish the relevant information / documentation / declarations in accordance with Applicable Laws, the Fund reserves the right to reject the application or redeem the Units held directly or beneficially and may also require reporting of such accounts and/or levy of withholding tax on payments made to the Unit holders / investor and/or take any other action/s in accordance with Applicable Laws. FATCA-CRS provisions are relevant not only at on-boarding stage of Unit holders but also throughout the life cycle of investment with the Fund. Unit holders therefore should immediately intimate to the Fund/the Investment Manager, any change in their status with respect to any FATCA-CRS related information / documentation / declarations provided by them previously, including but not limited to any declarations provided in respect of residency of the Unit holders for tax purposes. Further, if the Fund and/or the Investment Manager is required by Applicable Laws, to provide information regarding the Fund and/or the unit holders / investors to any

regulatory authority and/or the Fund Investments and/or income therefrom, and the Fund and/or the Investment Manager complies with such request in good faith, whether or not it was in fact enforceable, they shall not be liable to the Unit holders / investors or to any other party as a result of such compliance or in connection with such compliance.

Prospective investors / Unit holders should consult their own advisors to understand the implications of FATCA-CRS provisions/requirements. Please note that Axis MF will be unable to provide advice to any investor or counterparty about their tax status or FATCA/CRS classification relevant to their account. It is the responsibility of the investor or counterparty to ensure that they record their correct tax status / FATCA/ CRS classification. Investor/ counterparty may seek advice from their tax advisor in this regard. The onus to provide accurate, adequate and timely inputs in this regard would be that of the investor or counterparty. Any changes in earlier information provided must be intimated within 30 days of such change.

Investors are requested to provide all the necessary information / declarations to facilitate compliance, considering India's commitment to implement CRS and FATCA under the relevant international treaties.

CIR/MRD/DP/31/2014 dated November 12, 2014, in order to enable a single consolidated view of all the investments of an investor in Mutual Fund and securities held in demat form with Depositories, has required Depositories to generate and dispatch a single CAS for investors having mutual fund investments and holding demat accounts.

In view of the aforesaid requirement, for investors who hold demat account, for transactions in the schemes of Axis Mutual Fund on or after February 1, 2015, a CAS, based on PAN of the holders, will be sent by Depositories to investors holding demat account, for each calendar month within 10th day of the succeeding month to the investors in whose folios transactions have taken place during that month.

CAS will be sent by Depositories every half yearly (September/March), on or before 10th day of succeeding month, detailing holding at the end of the six month, to all such investors in whose folios and demat accounts there have been no transactions during that period.

CAS sent by Depositories is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan, systematic transfer plan (including transaction charges paid to the distributor) and transaction in dematerialized securities across demat accounts of the investors and holding at the end of the month.

For Unit Holders who have provided an e-mail address to the Mutual Fund or in KYC records, the CAS is sent by e-mail. However, where an investor does not wish to receive CAS through email, option is given to the investor to receive the CAS in physical form at the address registered in the Depository system.

Investors who do not wish to receive CAS sent by depositories have an option to indicate their negative consent. Such investors may contact the depositories to opt out. Investors who do not hold demat account continue to receive CAS sent by RTA/AMC, based on the PAN, covering transactions across all mutual funds as per the current practice.

In case an investor has multiple accounts across two depositories; the depository with whom the account has been opened earlier will be the default depository.

The dispatches of CAS by the depositories constitute compliance by the AMC/ the Fund with the requirement under Regulation 36(4) of SEBI (Mutual Funds) Regulations. However, the AMC reserves the right to furnish the account statement in addition to the CAS, if deemed fit in the interest of investor(s).

Investors whose folio(s)/demat account(s) are not updated with PAN shall not receive CAS. Investors are therefore requested to ensure that their folio(s)/demat account(s) are updated with PAN.

The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

The Net Assets Value (NAV) of the Units under the Scheme shall be calculated as shown below:
